I'm a 29 years old Web Developer from Turkey based in Antalya. I love everything that has to do with HTML, CSS, JavasScript, Node.js, React, SASS, Less, Preprocessors like Gulp, Webpack and I everything new around the Web.

OBJECTIVES

A developer with 6 years open-source experience. Worked on cutting edge applications mobile and web platforms as an outsourcing partner to web design agencies. Expert level in front-end development technologies, responsive design and UI performance. Having back-end and user interface design experience. Learning the Dart lang. and I keen to develop mobile applications with the Flutter framework.

EDUCATION

2008- 2012
Art Education - Bachelor's Degree
Pamukkale State University - Denizli, TR.

2014- 2017
Educational Technologies - Non-thesis Master's Degree
Suleyman Demirel State University - ISPARTA, TR.

SKILLS

HTML, CSS and CSS preprocessors such as SASS, SCSS and LESS

JavaScript and related libraries like ReactJS, Electron

CSS frameworks like Bootstrap, Foundation

JavaScript front-end workflow tooling with Gulp, Grunt, WebPack

Knowledge of MVC back-end frameworks, JSON and REST APIs

Significant experience in building mobile responsive & adaptive applications

Mobile-first design & progressive web applications

Experience in user interface design and back-end development

Websockets and realtime communication at the UI

Git Version Control System

SELECTED WORKS

KeepWords.
A simple tool for adding the new words which you just learned.
Tech stack: Firebase, PreactJS, Sass. It's a progressive web application (PWA) and it comes with offline sync built-in.
keepwords-com.firebaseapp.com

Fupio.
A simple microblogging app based on a blockchain and blockstack.
github.com/fupio

Huhu.
An experimental script language for kids, written in Python.
github.com/mehmetkose/huhu

Boilerplate.
Boilerplate project for creating hybrid web applications.
It's backed by PreactJS, Electron & Cordova. Uses SASS for styling.
github.com/mehmetkose/boilerplate

WORK EXPERIENCE

Jan 2019 -
Mobiroller
Front End Developer in Antalya, TR
It's a product company. Mostly I'm building PWA's for the company. Re-building the old UI's, by using ReactJS, Redux and related technologies.

July 2017 - 2017 Jun
Freelancing on Upwork
Hybrid Application Developer in Isparta, TR
I've done couple projects on Upwork. I wrote a technical paper for Pusher about websockets. Another project that I worked was a food finder app. Built a PWA by using React and Cordova on Firebase.

Feb 2016 - Jun 2017
Ertisya Software
Full Stack Web Developer in Isparta, TR
Created some Odoo (an open source ERP) modules for this company. Added some features for a Django project. Created a microservice for video convertion.

Nov 2015 - Feb 2016
Ihya Web Tech
Full Stack Web Developer in Denizli, TR
I've created lots of end-user website with PHP & Python backend. Created some sharp web crawlers to collapse some data. Experienced how Google Crawlers works and coding for SEO.

Mar 2013 - Jun 2014
ReachPod Social Media Tool & Media Agency
Full Stack Web Developer in Istanbul, TR
Worked with a 2 great senior developer at this startup. Kept working with Django Framework and I've done some UI parts of the product.

Sep 2013 - May 2013
Butigo Social Media Tool & Media Agency
Junior Backend Developer in Istanbul, TR
I worked as a junior python programmer and I've experienced working with a real team, and building a Django application.

Nov 2009 - Oct 2010
Technoone
Intern - in Denizli, TR
At this period I had a change to apply what I learned and show up my skills. Usually worked with XHTML and web UI's.
